

# The Incredible Dinosaur Show

Dinosaurs fascinate children, and adults too! Just look at all books, movies and television shows that feature stars that are 80+ million years old. In The Incredible Dinosaur Show, Magic Don brings the world of the dinosaurs back to life.

Using magic, puppets, storytelling, a mini play with costumed kid actors from the audience, and even a fossil or two, Magic Don educates and entertains at the same time.

*Who has the bigger mouth?*

He makes the facts real. “Can you pick up a car?” Magic Don asks a child. The child laughs and looks at him like he’s crazy. He continues, “Probably can’t pick up a Ultrasaurus either, they weighed 130 tons and lets see...a ton is 2,000 pounds and a small car weighs about 2,000 pounds; so one of the largest dinosaurs weighed as much as 130 cars”.

Preschoolers through 4th graders get a quick look at dinosaurs, what their world was like – but not like ours. Kids discover what the two “mystery fossils” are; and what animals they came from. They learn that new discoveries are being made everyday and that they too could be someone who discovers more about

*Magic Don laser measuring the room to see if a real T Rex would fit.*

Magic Don takes his 40 years of being a professional entertainer, and his love of adventure, and creates programs that pass on his excitement to the children.

He’s explored caves, jumped out of airplanes, flown in hot air balloons, performed in 12 different countries...and even dug for dinosaur fossils. And he still does 300+ shows a year.

The Incredible Dinosaur Show is one of the most popular Magic Don Programs. It’s because his enthusiasm is infectious, not only about the world of dinosaurs, but about enjoying the children. His audiences know he loves what he’s doing, and you will too.
